## DETAILED ACTION

### ***Claim Rejections – 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

19. In regards to claims 34 and 37, Marrah discloses the apparatus and method, wherein the receiver is a hand-held device (See col. 2 lines 59-63).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

20. Claims 7, 9, and 15-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Marrah et al (US 6,728,522).

21. Marrah discloses all of claim 7 limitations, except the apparatus, wherein the current location entered by the listener is a city name. Marrah, however, does disclose the apparatus, wherein the current location entered by the listener is a city code and/or zip code (See col. 3-4 lines 65-21), therefore, it would have been obvious for one of ordinary skill in the art at the time of the invention to employ this feature within the system as a way of providing to the listener another method of entering the current location.

22. Marrah discloses all of claim 9 limitations, except the apparatus, wherein the current location entered by the listener is entered via voice input. Marrah, however, does disclose the apparatus, wherein the current location entered by the listener is entered via a keypad integral to the apparatus (See col. 3 lines 1-10), therefore, it would have been obvious for one of ordinary skill in the art at the time of the invention to

employ this feature within the system as a way of providing to the listener another method of entering the current location.

23. Marrah discloses all of claim 15, 16, and 17 limitations, except the apparatus, wherein the database of broadcast services is provided to the receiver by a CD-ROM disc, a CD-RW disc, or a writable DVD. Marrah, however, does disclose the apparatus wherein the database of broadcast services is provided to the receiver by a removable memory module (See col. 5 lines 45-50).

### ***Conclusion***

24. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kimura et al (US 5,584,061) teach a receiver with automatic tuning function.
